

Physics Laboratory Manual (PHLAB1 & PHLAB2)

Course Code: 25B17PH171 • Ground Floor Academic Block 1 • JUIT

1. Optics & Mechanics Experiments List

- Exp 1: Determination of wavelength of sodium light using Newton's Rings apparatus.
- Exp 2: Determination of grating element and mercury spectral wavelengths with spectrometer.
- Exp 3: Measurement of Numerical Aperture (NA) and attenuation of optical fiber.
- Exp 4: Determination of Planck's constant using Photoelectric Effect photocell setup.
- Exp 5: Measurement of Hall coefficient and carrier concentration in semiconductor crystal.
- Exp 6: Study of magnetic hysteresis loop using B-H curve tracer oscilloscope.
